albert einstein once wrote the supreme task of the physicist is to arrive at those universal laws from which the cosmos can be built up by pure deduction remarkably in this book we arrive at those universal axioms from which universal science can be built up by pure deduction within the prevailing paradigm of science the mathematical philosophy of nature we show it is not possible to unify science to overcome this limitation we introduce a new more general paradigm since the new paradigm is a generalisation of the mathematical philosophy of nature we are able to retain the mathematical knowledge built up within the prevailing paradigm within the new paradigm we introduce four empirical universal axioms from which we deduce that it is not possible to mathematically unify the two fundamental theories of physics quantum theory and general relativity instead from the universal axioms we logically deduce the first symmetry of nature the first invariance of nature the universal arrow of time the universal laws of nature and the three universal dynamic theories of nature quantum theory general relativity and universal evolution the first symmetry of nature and first invariance of nature arise from the constancy of the universal laws of nature not only being a symmetry but a unifying symmetry the biological view of universal evolution provides a new theory of biological evolution that replaces what we show is the deficient neo darwinian synthesis in a similar way theories of evolution in all the sciences are based on their respective views of universal evolution from the universal axioms we deduce the universal features of nature thereby unifying physics chemistry biology psychology sociology economics and all of science this book is written for scientifically inclined general readers teachers students scientists philosophers physicists chemists biologists psychologists sociologists and economists

spinoza and moral freedom guides the reader through spinoza s principal ideas and powerful lines of reasoning clearing up obscurities along the way while acknowledging the genuine difficulties and gaps at the same time it neither intrudes the author s own beliefs and personality upon the reader nor gives instructions on what the reader s own final judgment should be what kashap offers is pure spinoza rather than a spinoza reformed in light of another person s wishes or preoccupations in this respect kashap s approach is refreshingly new and unique the style is graceful and lucid and in no way obscured by philosophical jargon

this is my new e book called the big book of universal laws the rule book in it i will attempt to explain the universal laws many times called god s law the spiritual laws moral laws or the natural laws and how they apply to your life and your opportunities for success now you may know about most of these laws but you may not even realize that these laws are having an effect on your life and your chances for success awareness of them is crucial if you hope to achieve wealth but if you can find a formula for success in the use of these laws and can show people the right way to use these laws then you have created a powerful success formula and that is what i am attempting to do here all of these laws are immutable unalterable and unchangeable meaning that they can not be changed altered or silenced in any way and they super cede the laws of man these laws apply to everyone on the planet and if you do not know them they are still having an effect on your life so i am going to try to make you aware of these laws and how they apply to you this book is designed by me to help you understand these laws that have come straight from the heavens to all of us humans to help us navigate this life we are now living these laws come from this source of power we call infinite intelligence the creator of everything in the known and unknown universe this source of power is also called universal intelligence because it contains all of the intelligence in the universe universal power because it controls all power in the universe and universal energy because it contains within itself all of the energy in the universe and is the same entity of power that many people call god this source of unlimited power has given to man a powerful tool in his brain called the sub conscious mind that when it is trained or conditioned
